

BC2402 Group Project – Marks Allocation

The entire project contributes 30% to the overall assessment.

There are three key deliverables, namely

- A. SQL and noSQL solutions
- B. 1 x project report
- C. 1 x presentation

Relational Database (15%)	Nonrelational Database (15%)
<ul style="list-style-type: none">- SQL statements for queries (10% = 2% team-based + 8% individual)- Report (2% team-based)- Presentation (3% = 1.5% team-based + 1.5% individual)	<ul style="list-style-type: none">- noSQL statements for queries (10% = 2% team-based + 8% individual)- Report (2% team-based)- Presentation (3% = 1.5% team-based + 1.5% individual)

The group project is assessed at both individual level and group level, and hence it is critical for your team to provide a clear task-allocation breakdown. For details, please consult the Task Allocation document, which can be found within the assignment folder on NTULearn.

Do note that peer evaluation exercises will be conducted. Results of the peer evaluation exercises will be considered in individual grading.
